

FUND HIGHLIGHTS

Our Investment Approach is predicated on the belief that great long-term investment opportunities can arise out of near-term factors. By focusing on a business' intrinsic value and not near-term market noise, whether it be due to outlook, business complexity, or other reasons, our investment approach affords us the ability to invest in businesses at what we believe are deeply-discounted prices. To do this, we observe the following principles:

Focus on well-capitalized companies	We seek to buy companies that we believe are well-capitalized as we think they have a better ability to survive difficult periods and thrive over the long-term.
Opportunistic mandate	We have flexibility in terms of where we can invest and tend to find opportunities in less-followed companies in both developed and emerging markets.
Bottom-up portfolio construction	We build the portfolio completely from the bottom up, not based on an Index. Because of this, our overlap with holdings in the index tends to be lower.
Concentrated portfolio	The Fund generally has a more concentrated portfolio, which allows for a focus on higher-conviction ideas.
Long-term investment horizon	We are patient, long-term investors. We seek to take advantage of depressed stock prices due to what we believe are near-term factors, focusing instead on our estimate of the long-term intrinsic value of the company.
Flexibility on cash	The ability to hold cash when opportunities are not plentiful allows us to buy quickly when sentiment swings to the other extreme and near-term market disruptions create opportunities.

INVESTMENT OBJECTIVE

The Fund's objective is long-term capital appreciation.

Fund Overview

Inception Date:	June 1, 2016
Style:	Deep Value
Geographic Focus:	Global
Market Cap. Focus:	All Cap
Fund Ticker:	Class N: MOWNX Class Inst.: MOWIX

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. Returns are shown net of fees and expenses and assume reinvestment of dividends and other income. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Investment performance reflects expense limitations in effect. In the absence of such expense limitations, total return would be reduced.

The Fund's adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least March 31, 2020, to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (exclusive of any taxes, brokerage fees and commissions, borrowing costs, acquired fund fees and expenses, fees and expenses associated with investments in other collective investment vehicles or derivative instruments, or extraordinary expenses such as litigation) will not exceed 1.65% and 1.40% for Class N and Institutional Class Shares, respectively.

1. Inception date of the Moerus Worldwide Value Fund is June 1, 2016.

2. The MSCI All-Country World Index (Net) is an unmanaged index consisting of 47 country indices comprised of 23 developed and 24 emerging market country indices and is calculated with dividends reinvested after deduction of withholding tax. The Index is shown solely for comparison purposes and the underlying holdings of the Index may differ significantly from the portfolio. The Index is a trademark of MSCI Inc. and is not available for direct investment.

Investing in Mutual Funds involves risks including the possible loss of principal and there can be no assurance that any investment will achieve its objectives. International investing involves increased risk and volatility due to currency fluctuations, economics and political conditions, and differences in financial reporting standards.
